Capabilities Statement

Southwest Envirotx Partners, LLC. Dba EnviroTx: SWETX is a pavement solution company, that provides a multitude of high-performance, value-added materials that preserve, enhance, and extend the life of the pavement. We supply everything from soil stabilizers to dust suppressants, road deicers-both granular and liquid, primers, tack coats, cap-overseals, fog seals, high-performance cold pour and hot pour, crack fill, and joint fill, and an all-in-one crack fill and fog seal. We also have engineered crumb rubber.

Dust Control - high-performance materials to combat dust, erosion, water usage, and mntc issues. Deicers - full line of granular and liquids to be used in lieu of aggregates and salts. Fogseals - high-performance material, no VOC/ solvent free for chip seal, and asphalt rejuvenation. Crackfill - high-performance cold/hot pour crack filling material. Cap Overseal - asphalt emulsion for tack coat, primer, and over seal. Cold patch pothole repair concrete patch concrete sealer/purger/rejuvenator

We take pride in salvaging your degraded pavement surfaces and providing solutions for every challenge you may face with building and maintaining your paved and unpaved surfaces.

Core Competencies

- Pavement maintenance products
- Road deicers
- Dust control/ soil stabilizers
- Crackfill/jointfill
- Fogseal/primer/ tack coat
- Concrete rejuvenator/sealer/curing accelerator
- Engineered crumb rubber asphalt additive
- Any pavement problem is what we solve

Differentiators

SWETX has higher performing, value-added materials for all traditional road building and road maintenance materials. Our materials are implemented into the road surface faster, they cure faster, perform longer, and are cost-effective. We have LTL, trucking, and rail capabilities to ship throughout the country. Virtually every product we have is a proprietary, high-performance alternative to traditional mid-grade materials. Soil stabilizers, dust, control, deicers, panel, patch, concrete, patch, etc.
